

WATER RESOURCES MANAGEMENT POLICY

Conducting our activity in accordance with legal regulations binding on us and the idea of sustainable development, we are oriented on continuous improvement of the Environmental Management System and minimizing the negative impact on the environment.

PCC Exol SA while implementing the objectives of Sustainable Development takes into account environmental aspects, including water aspects, given the adverse changes in the environment that bring with them a number of threatening phenomena.

The Company's objective is to manage water resources in an integrated manner in accordance with legal and other regulations. The Company strives to optimize the use of water resources by involving all employees in water management, planning and implementing innovative ideas to optimize water resources management, taking into account teamwork.

The Company coordinates economic, social and political activities, placing the objectives of sustainable development above all, in accordance with UN 2030 Agenda.

Water resources are managed without compromising environmental aspects. The Company declares actions committing to prevent and minimize the use of water resources, only for the purposes indicated.

Goals are coordinated and achieved through, but not limited to:

- optimal and responsible water management planning,
- assessment of risks and opportunities associated with water use,
- identification, monitoring and ongoing analysis of water usage,
- protection of water resources,
- planning the development of the organization based on environmentally friendly technologies,
- improvement of water management through planning and implementation of innovative ideas aimed at optimal management of water resources,
- taking preventive measures related to water management,
- building a sense of responsibility and awareness of Employees and Business Partners for activities that affect water management.

When implementing the provisions of this policy, PCC Exol SA relies in its activities on the provisions of legal regulations, i.e: Environmental Law and Water Law.

The Company's Board of Directors shall communicate this Policy to all Employees and Business Partners and require them to implement its provisions.
