

WATER RESOURCES MANAGEMENT POLICY

Conducting our activities in accordance with the legal regulations binding on us and the idea of sustainable development, we are focused on continuously improving our Environmental Management System and minimising the negative impact on the environment.

In pursuing its Sustainable Development objectives, PCC Exol SA takes into account environmental aspects, including water aspects, taking into consideration the adverse environmental changes that bring about a number of threatening phenomena.

The Company's objective is integrated water resources management in accordance with legal and other regulations. The Company aims to optimise the use of water resources by involving all employees in water management, planning and implementing innovative ideas aimed at optimal water resources management, taking into account teamwork.

The Company co-ordinates economic, social and political activities while prioritising the sustainable development goals, in line with the UN's 2030 Agenda.

Water resources are managed without compromising environmental aspects. The company declares a commitment to prevent and minimise the consumption of water resources, exclusively to the purposes indicated.

The objectives are co-ordinated and pursued through, among other things:

- optimal and responsible water management planning,
- assessment of risks and opportunities related to water consumption,
- identification, monitoring and ongoing analysis of water,
- protection of water resources,
- planning the development of the organisation on the basis of environmentally friendly technologies,
- improvement of water management through the planning and implementation of innovative ideas aimed at optimal water resources management,
- taking preventive measures related to water management,
- building a sense of responsibility and awareness among Employees and Business Partners for activities that have an impact on water management.

In implementing this policy, PCC Exol SA bases its activities on the provisions of legal regulations, viz: the Environmental Protection Law and the Water Law.
